

GANALAXMI
ELECTRICALS

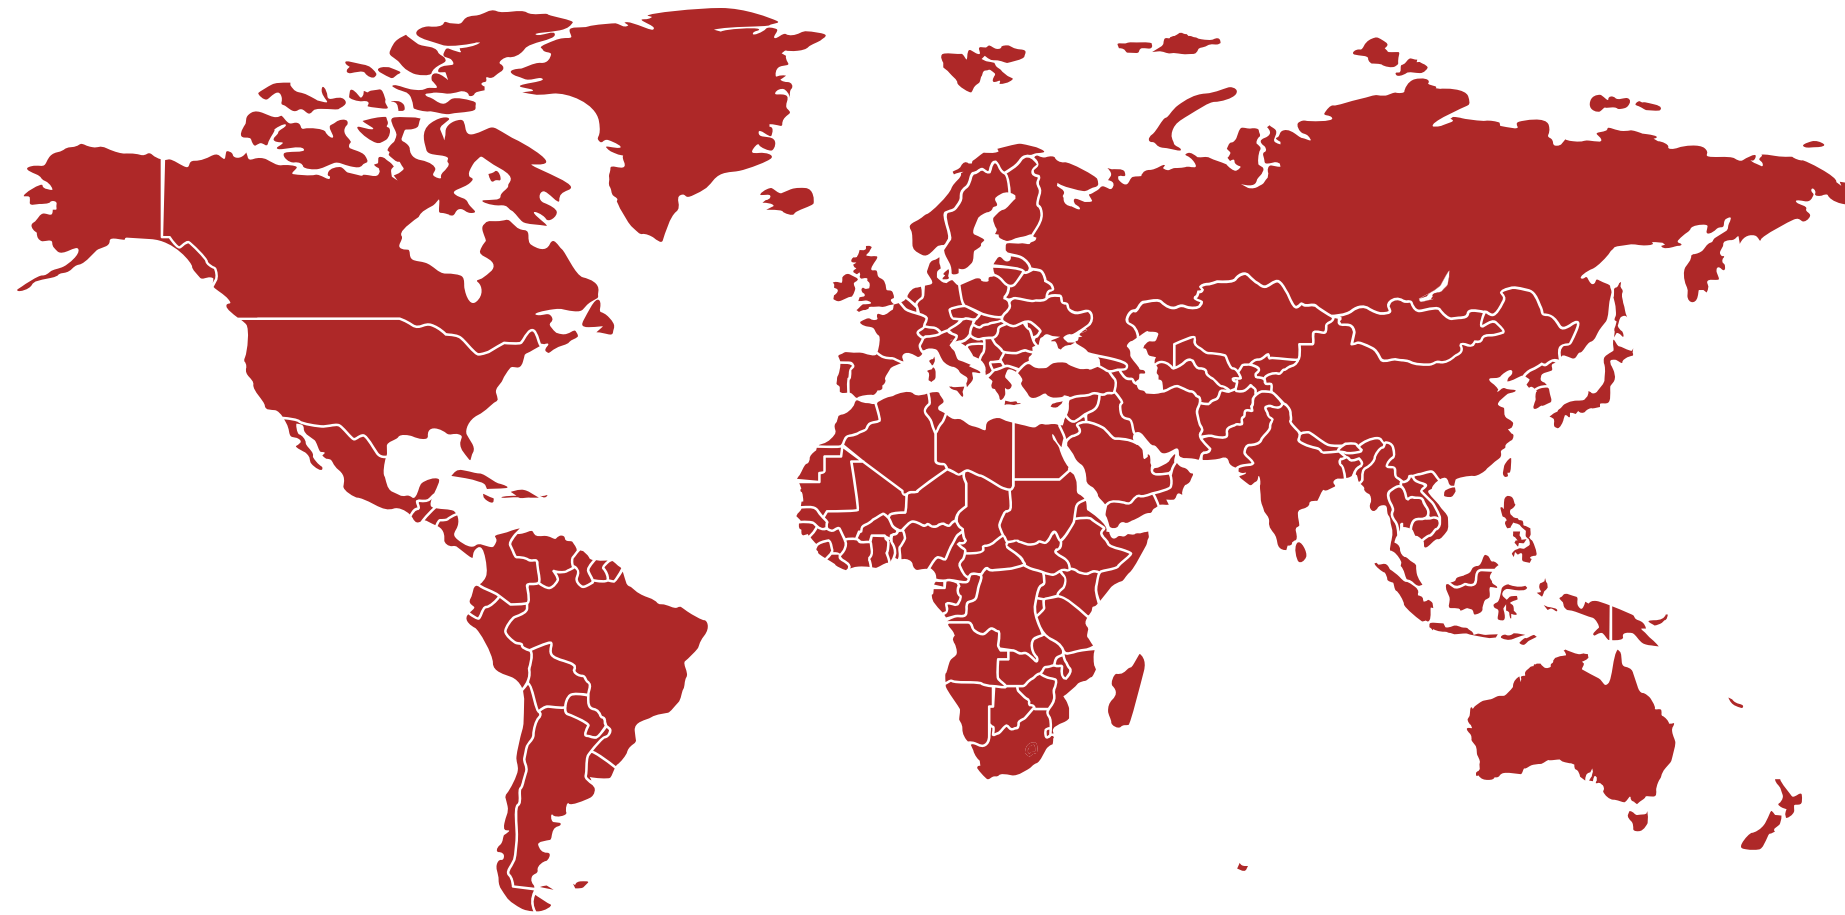

We are an expert company specializing in Turnkey Electrical & Automation Solutions. Our services cater to domestic, commercial, and industrial sectors, tailored to meet our customers' specific needs. Our process begins with initial planning, followed by designing, installation, and final implementation with a focus on quality.

Our vision is to be the best solution provider in the design, distribution and implementation of industrial Electrical & automation systems.

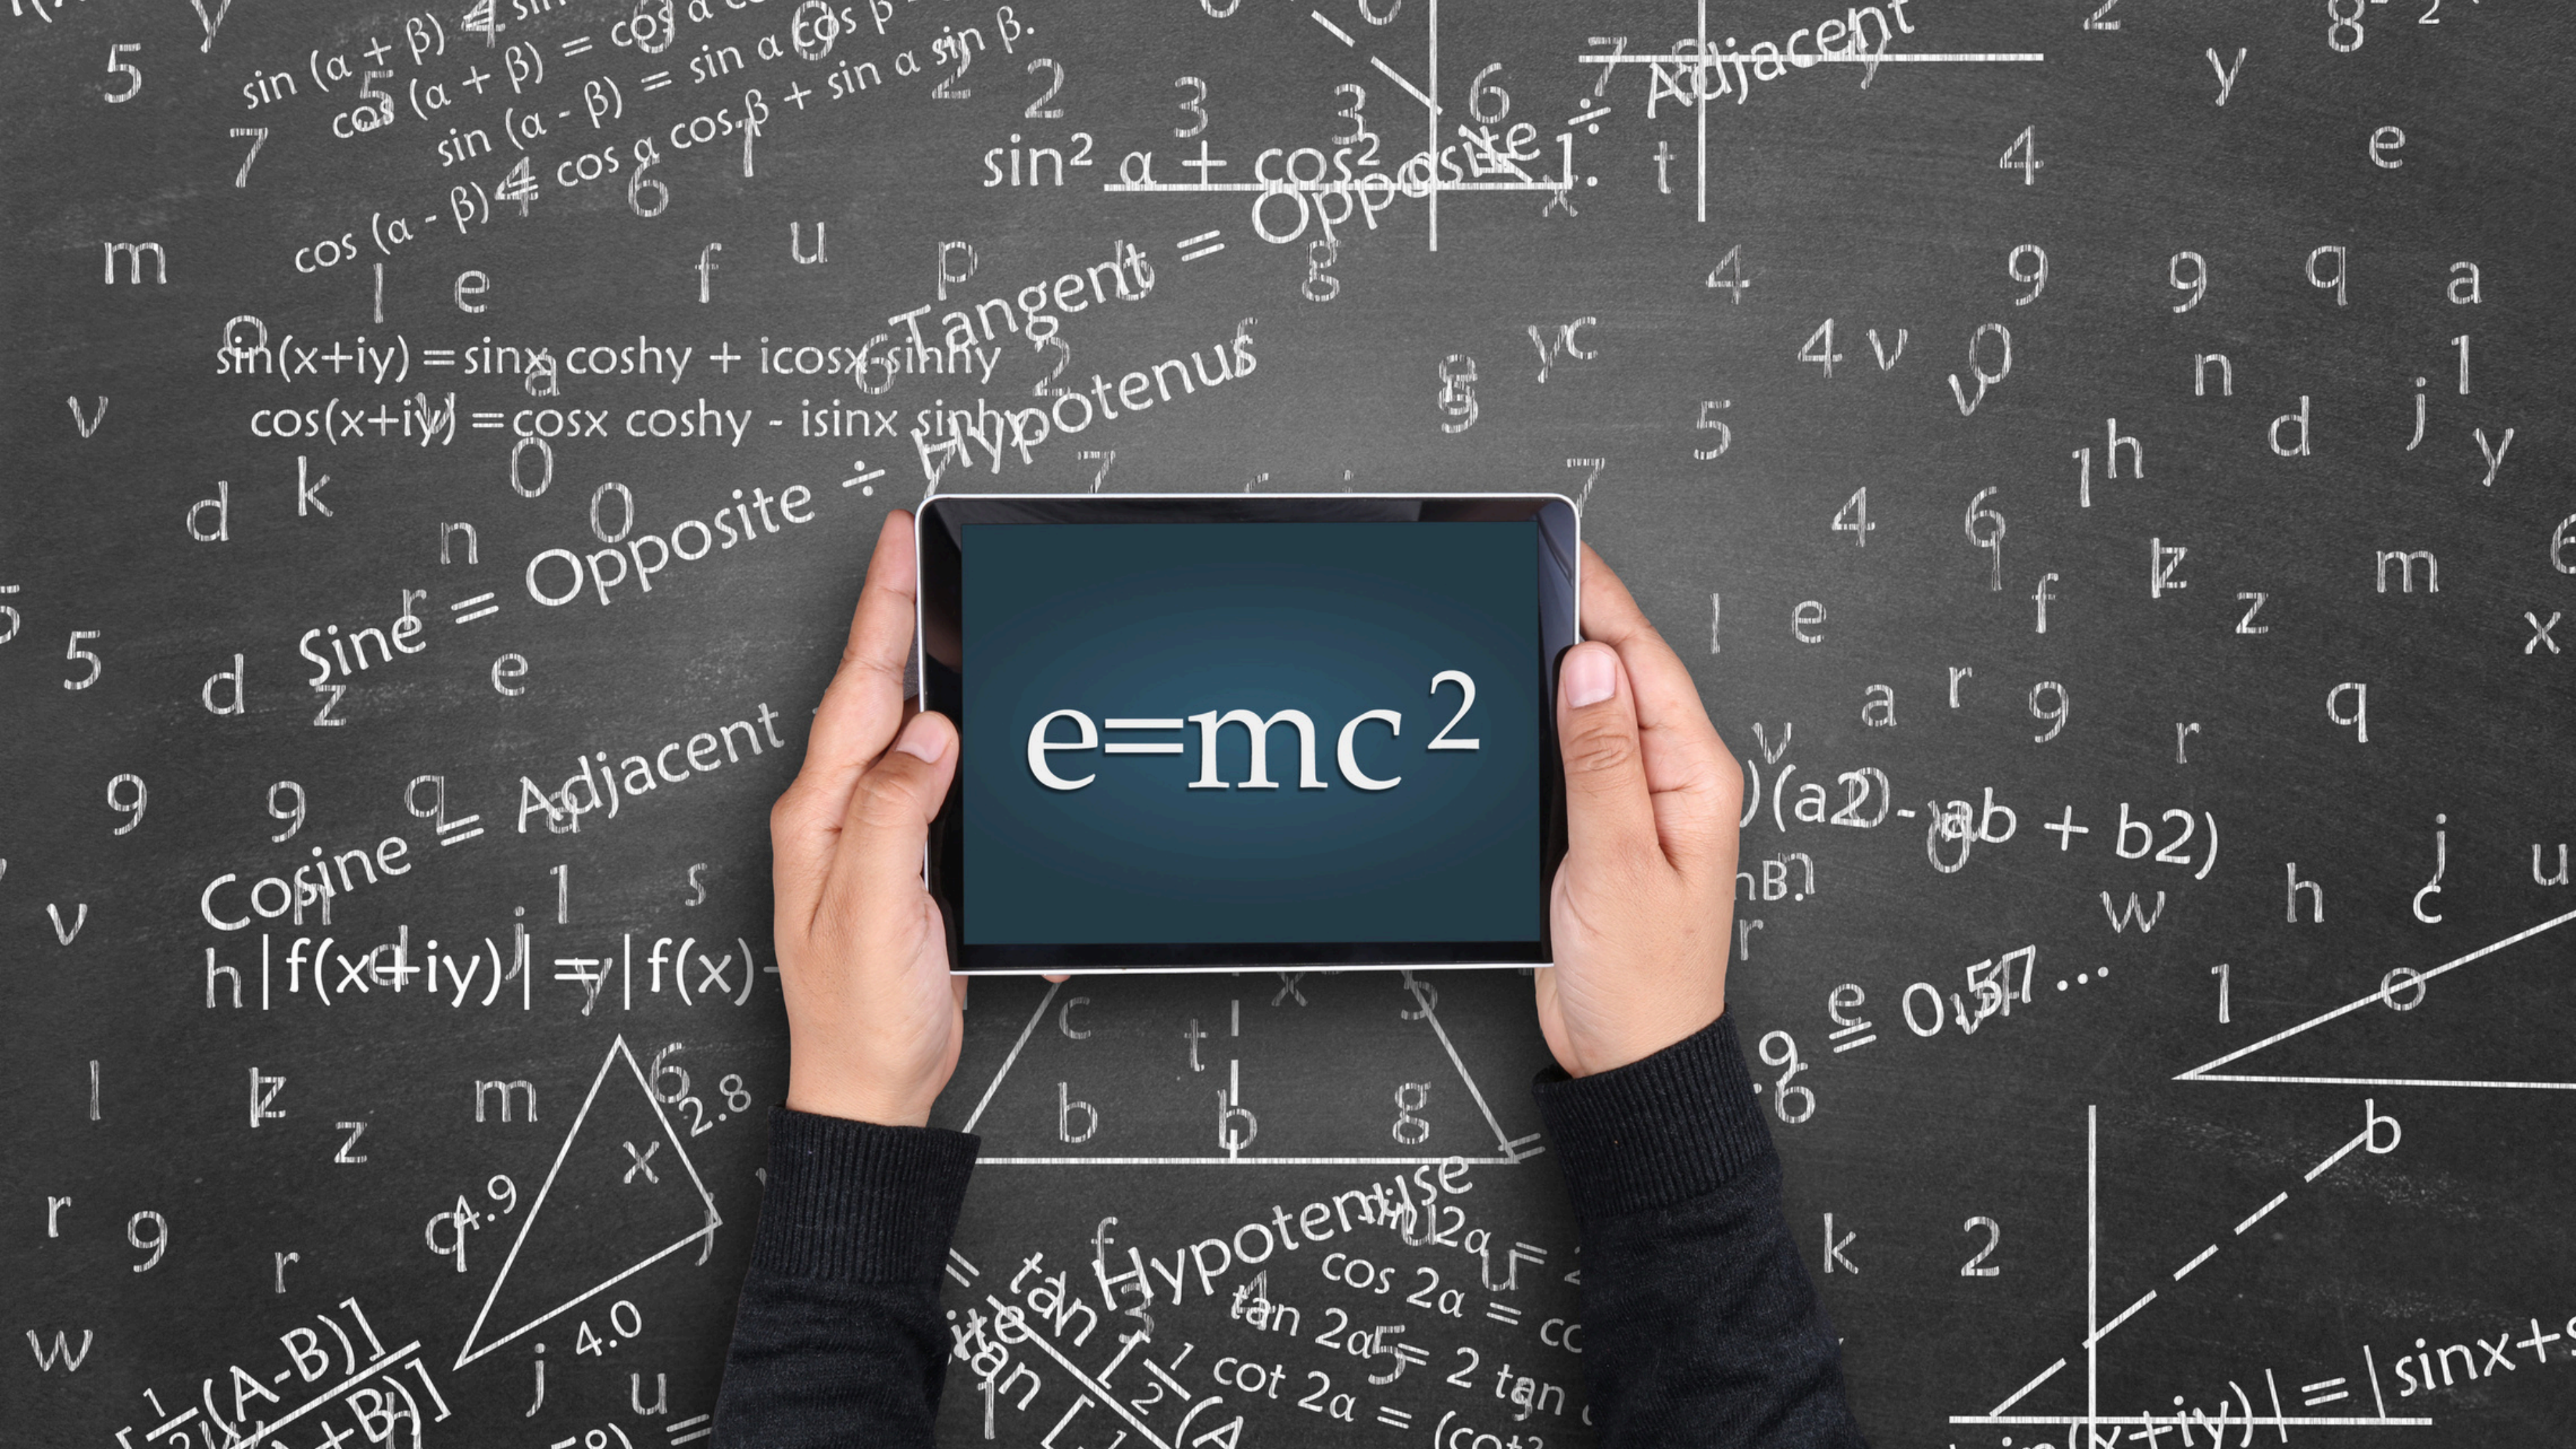

Our Mission

To listen to our customers need and provide perfect service, distribute quality products and offer technologically advanced solutions. To provide a safe and pleasant work environment to our employees.

Core Values

Honesty and transparency
Professionalism
co-operation with clients
Customerfocus

$$E=mc^2$$

GANALAXMI
ELECTRICALS

Our Products

Electrical Solutions

- All types of Turnkey EPC Electrical Solution for Plant.
- All types of Electrical Panels Manufacturer (Starters, MCC Panels, PCC Panels, Crane Panels, VFD Panels)
- Total Electrical Plant Erection & Commissioning.

Industrial Automation Solutions

- Turnkey Solutions of Plant Automation works
- All Type of Field Instrumentation Work
- Loop Test, IO Testing
- Supervision & Technical Solution

Embedded Solutions

- Embedded System Development
- PCB Development
- IOT Solutions
- Prototype Developments

Solar Solutions

- EPC Solar Solution
- ACDB & DCDB Panel Manufacturing

Material Supplies

- All Type of Electric material Supplier
- All Type of Automation / Instrumentation & Pneumatic Material Supplier

GANALAXMI
ELECTRICALS

All types of Turnkey EPC Electrical Solution for Plant.

Our Turnkey EPC Electrical Solutions encompass the entire process from design to execution, ensuring seamless integration of electrical infrastructure for plant operations. We specialize in custom designs, robust power distribution, efficient lighting, earthing and lightning protection, advanced control and automation systems, comprehensive safety measures, and thorough testing and commissioning. With our expertise, we deliver high-quality, reliable solutions tailored to meet the specific needs of each plant.

All types of Electrical Panels Manufacturer- Starters, MCC Panels, PCC Panels, Crane Panels, VFD Panels

We manufacture a variety of electrical panels, including starters, MCC panels, PCC panels, crane panels, and VFD panels, designed to ensure efficient and reliable operation in industrial applications.

Total Electrical Plant Erection & Commissioning.

We specialize in the complete erection and commissioning of electrical plants, ensuring smooth operation and maximum efficiency. Our services cover every stage, from installation to testing and final commissioning, guaranteeing that the electrical infrastructure meets industry standards and operational requirements.

Turnkey Solutions of Plant Automation works

We provide comprehensive Industrial Automation Solutions, offering turnkey services for plant automation works. Our expertise includes designing, implementing, and optimizing automation systems tailored to the specific needs of industrial plants. From conceptualization to execution, we ensure seamless integration of automation technologies to enhance efficiency, productivity, and control throughout the plant's operations.

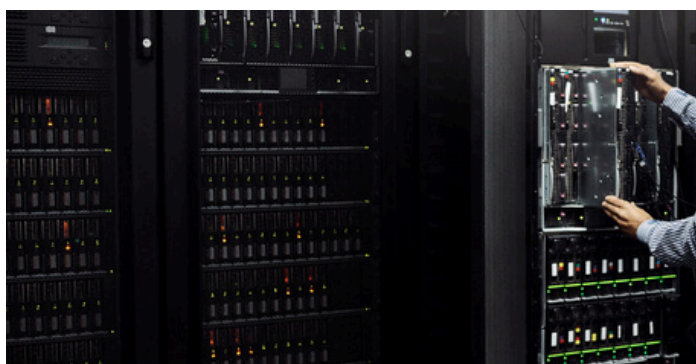

All Type of Field Instrumentation Work

We specialize in all types of field instrumentation work, covering a wide range of instruments used for process measurement and control in industrial settings. Our services include installation, calibration, maintenance, and optimization of instruments such as sensors, transmitters, flow meters, level gauges, and pressure indicators. We ensure accurate and reliable data acquisition and control, facilitating efficient operation and performance monitoring in various industrial processes.

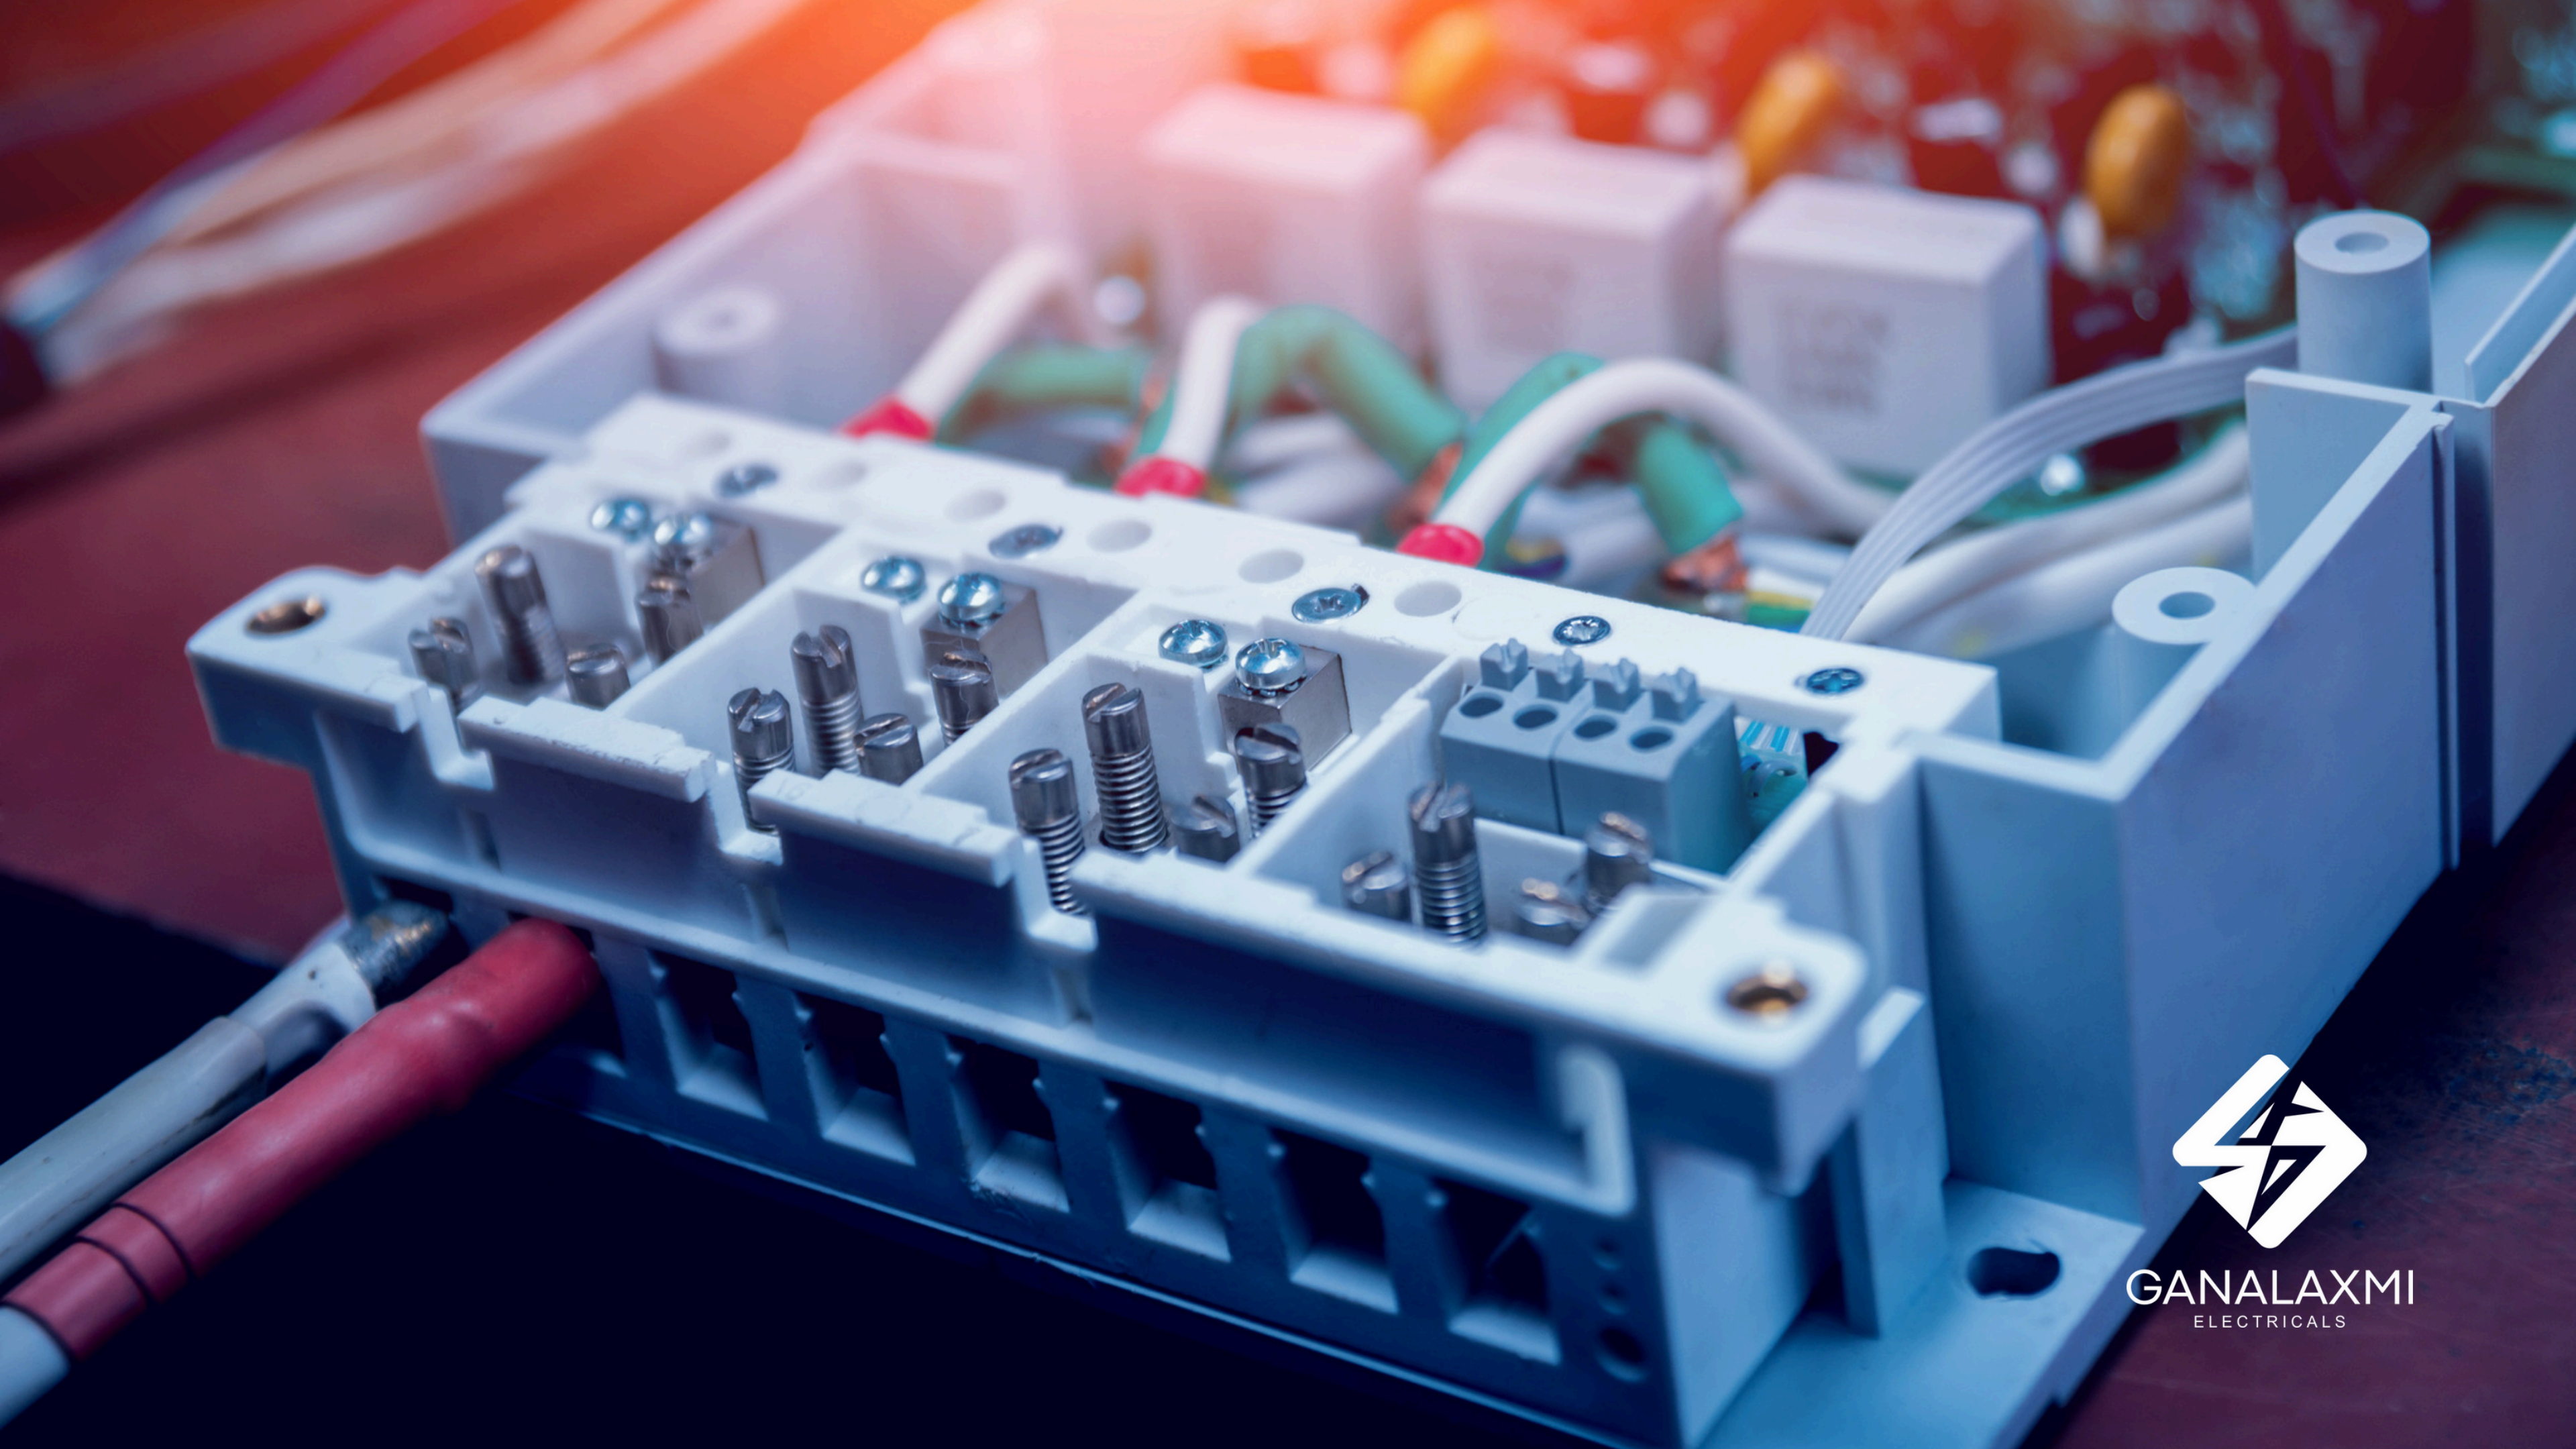

Loop Test, IO Testing

We excel in loop testing and I/O (Input/Output) testing, crucial processes in industrial automation. Loop testing involves verifying the functionality of control loops to ensure proper communication and operation between instruments and control systems. I/O testing focuses on validating the inputs and outputs of control systems to guarantee accurate data exchange and command execution. Through meticulous testing procedures, we ensure the reliability and effectiveness of automation systems, optimizing plant performance and productivity.

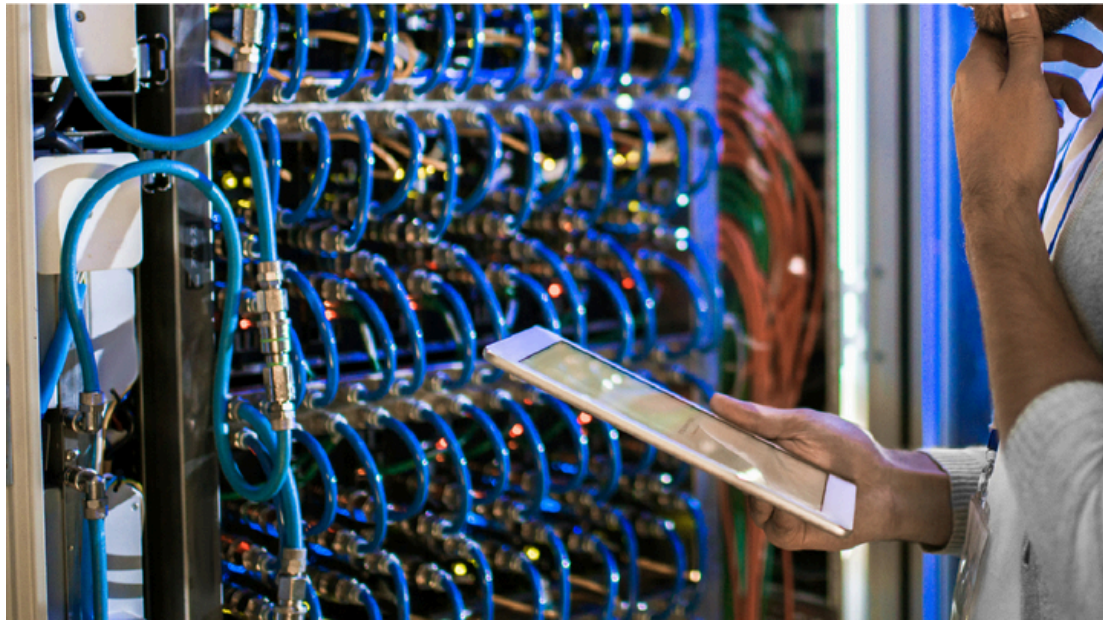

Supervision & Technical Solution

We offer supervision and technical solutions for industrial projects, providing expert oversight and guidance throughout the implementation process. Our experienced team ensures that projects adhere to design specifications, safety standards, and regulatory requirements. Additionally, we provide technical solutions to address challenges and optimize performance, leveraging our knowledge and expertise in industrial automation and electrical engineering. Our supervision and technical support ensure the successful execution of projects, delivering efficient and reliable solutions to our clients.

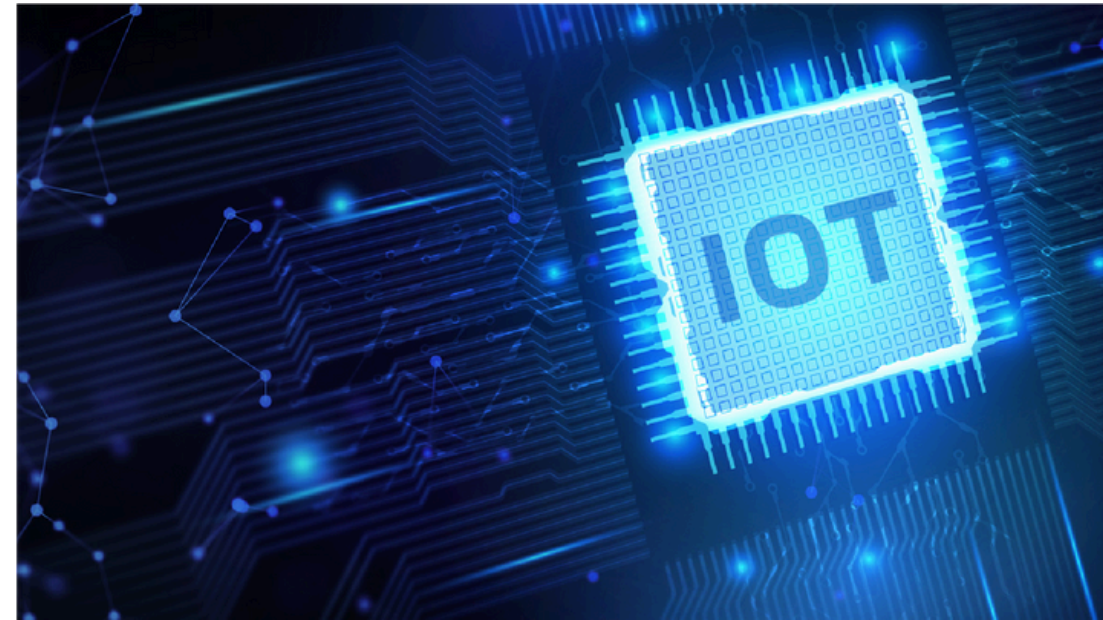

GANALAXMI
ELECTRICALS

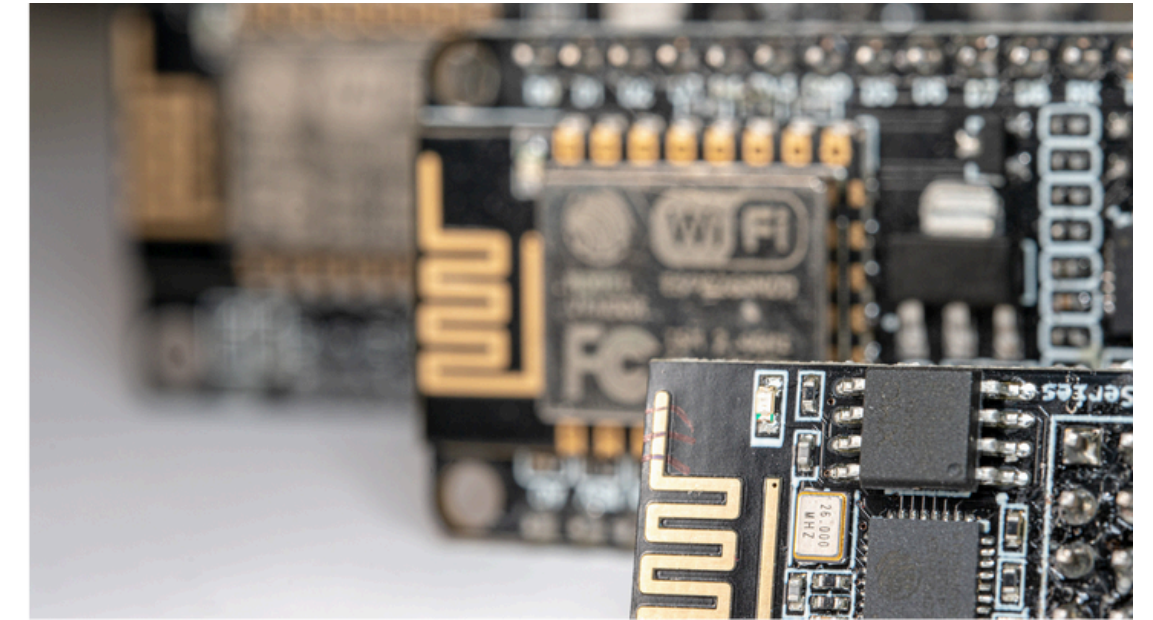

Embedded System Development

We specialize in embedded solutions and the development of embedded systems tailored to various applications. Our expertise encompasses the design, prototyping, and implementation of embedded hardware and software solutions. From microcontroller-based systems to complex embedded platforms, we deliver innovative solutions to meet specific project requirements. Our embedded systems are designed for reliability, efficiency, and scalability, enabling seamless integration into diverse industrial, consumer, and IoT (Internet of Things) applications.

IoT Solutions

We excel in providing IoT (Internet of Things) solutions tailored to meet the unique needs of our clients. Our expertise encompasses the development of end-to-end IoT solutions, including sensor integration, data acquisition, connectivity, cloud integration, and application development. We design scalable and secure IoT architectures that enable real-time monitoring, control, and automation of various processes and systems. Our IoT solutions empower businesses to gather valuable insights, optimize operations, and enhance efficiency across a wide range of industries, from manufacturing and agriculture to healthcare and smart cities.

Prototype Developments

We specialize in prototype development services, helping clients transform their ideas into tangible prototypes for testing and validation. Our expert team utilizes state-of-the-art technologies and rapid prototyping techniques to quickly iterate and refine concepts into functional prototypes. Whether it's hardware, software, or a combination of both, we have the capabilities to develop prototypes that accurately represent the final product. Our prototype development process focuses on innovation, flexibility, and collaboration, ensuring that clients receive high-quality prototypes that meet their specifications and requirements.

ELECTRICALS

EPC Solar Solution

We specialize in prototype development services, helping clients transform their ideas into tangible prototypes for testing and validation. Our expert team utilizes state-of-the-art technologies and rapid prototyping techniques to quickly iterate and refine concepts into functional prototypes. Whether it's hardware, software, or a combination of both, we have the capabilities to develop prototypes that accurately represent the final product. Our prototype development process focuses on innovation, flexibility, and collaboration, ensuring that clients receive high-quality prototypes that meet their specifications and requirements.

ACDB & DCDB Panel Manufacturing

We specialize in manufacturing ACDB (Alternating Current Distribution Board) and DCDB (Direct Current Distribution Board) panels. Our panels are crafted with precision using high-quality components to ensure reliability and efficiency in electrical distribution systems.

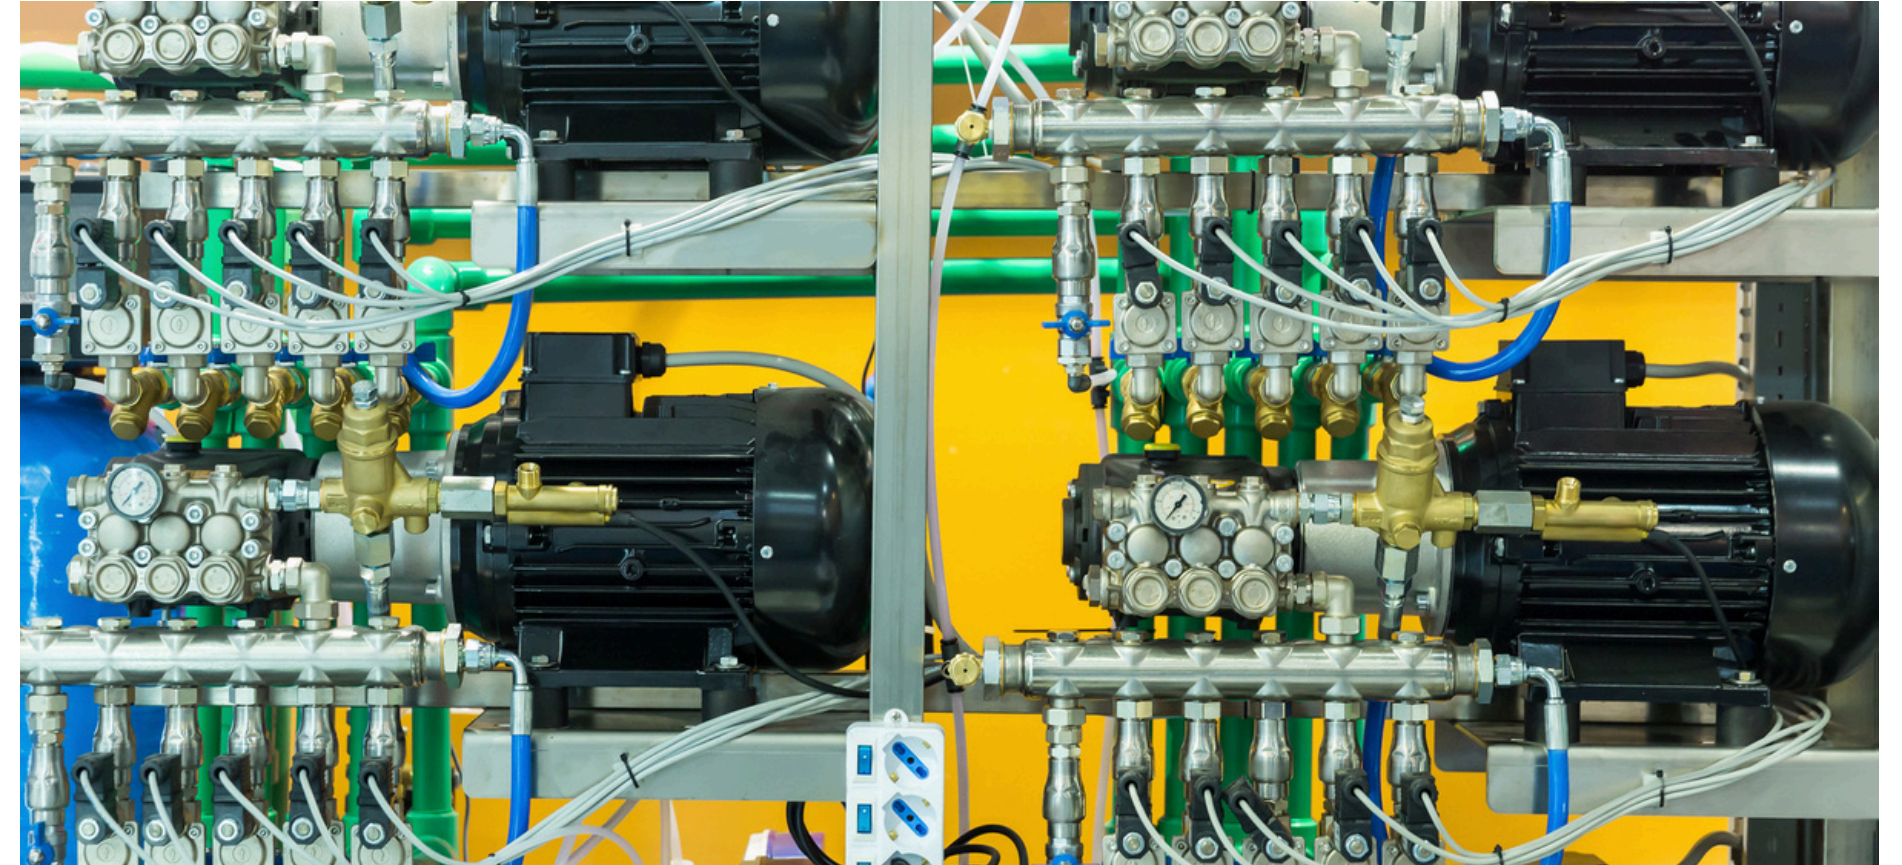

Solar Solutions

All Type of Electric material Supplier

We provide comprehensive supply services for all types of electrical materials. From cables and wires to switches, sockets, and other electrical components, we offer a wide range of products sourced from reputable manufacturers. Our commitment to quality ensures that our clients receive reliable and compliant electrical materials for their projects.

All Type of Automation / Instrumentation & Pneumatic Material Supplier

We are your one-stop supplier for all types of automation, instrumentation, and pneumatic materials. Whether you need sensors, controllers, actuators, valves, or other automation components, we offer a comprehensive range of products sourced from trusted manufacturers. Our commitment to quality and reliability ensures that you receive top-notch materials for your automation and instrumentation needs.

Prevent accidents, choose safety—hire experts
like Ganalaxmi Electricals for your projects.
